### DESCRIPTION

HIPOWER® HS Stationary Series generators are an efficient, reliable and versatile source of standby electrical power. Designed to operate in the most extreme working conditions. All HIPOWER® HS Stationary Series Generators combine an innovative design and the use of high quality materials that provide the user with the most dependable power that you can rely on for non-stop power with easy to operate controls. Powered by a radiator-cooled, industrial YANMAR Diesel engine, which meets current Environmental Protection Agency (EPA) TIER 4 Interim exhaust emission regulations, driving a single bearing, four-pole, three-phase alternator, with IP23 protection. The Standby Power kVA rating for generator set is given with a 125 °C alternator winding temperature rise.

### HIPOWER® FEATURES AND BENEFITS

**YANMAR Diesel Engine:** Long-life, heavy-duty, 4-cycle, direct injection engine for economy of operation and maximum reliability and durability. Capable of full rated load acceptance in one step.

**Cooling:** Radiator with belt driven pusher fan.

**Air Filter:** Heavy-duty replaceable element air-cleaner.

**Alternator:** Single bearing, rotating field, self-excited, self-ventilated, 12-wire re-connectable, 4-wire dedicated for single phase version, 60Hz brushless alternator, Class H insulation. Automatic voltage regulator (AVR) providing close voltage regulation and skVA starting capability for electric motor loads.

**Enclosure:** Fabricated in Aluminum, powder coated with finish that exceeds 1000-hr salt spray test, minimum outside fasteners and four points lift. Vertical air discharge for quiet operation. Wide Aluminum lockable access doors with seals, easy access for maintenance and service activities, lift off stainless steel hinges, corrosion resistant hardware and fasteners.

**Exhaust:** Low noise, steel residential-type exhaust silencer.

**Fuel Filtration:** Standard and secondary water separator with visible level on fuel filters.

**Controls:** Digital control panel with manual and automatic start and stop features. Many programmable automatic functions for local and remote controls with LED lights, tamper proof engine hour recorder.

**Certification:** ISO 8528-5.

| Voltage Regulation – No load to full load with AS480 AVR | ± 1%                                                                     |
| TIF                                                      | <50                                                                      |
| Radio Frequency Emissions Compliance                     | Meets requirements of most industrial and commercial applications        |
| Line Harmonics                                           | 5% maximum                                                               |

### STANDARD ACCESSORIES

|                                             |                                                                   |
|---------------------------------------------|-------------------------------------------------------------------|
| • Radiator with Pusher Fan                  | • Main line ABB UL listed circuit breaker for overload protection |
| • Control Panel CEM7 (See over for details) | • Heated Control Panel                                            |

### OPTIONAL ACCESSORIES

|                                |                            |
|--------------------------------|----------------------------|
| • Battery with Cables          | • Anti-Condensation Heater |
| • Battery Blanket              | • Water Jacket Heater      |
| • 6 Amp Battery Charger, 12VDC | • Fuel Tank Raiser         |

CONTROL SYSTEMS STANDARD FEATURES - Generator Digital Control Panel

HIPOWER® Control Panel: HIPOWER digital controller with auto and manual start capability. Digital readout for: volts between each phase & neutral, volts between phases, amps per phase, frequency, kW and kVA power, power factor, KW hour with accumulation by day, month and year, fuel reserve, oil pressure, coolant temperature, battery volts and charging alternator volts, engine speed, hours running. Engine alarms for high coolant temperature, low oil pressure, emergency stop activated, battery charging failure, low coolant level, low fuel level, over-speed, under-speed and low battery volts.

Engine alarms included: High coolant temperature, low oil pressure, low coolant level, unexpected shutdown, low fuel level, stop failure, low battery voltage, battery charging alternator failure, over-speed, under-speed, start failure and emergency stop. Support of engines with ECU (J1939, Modbus and other proprietary interfaces); alarm codes displayed in text form.

Alternator alarms included: Overload, unbalanced voltage, over voltage, under voltage, over frequency, under frequency, short circuit and reverse power.

DIMENSIONS, WEIGHTS & SOUND LEVELS

ENCLOSED SET

| CONFIGURATION                | Fuel Tank Data (Standard) |                 | Generator Data * |           |            |            |     |
|------------------------------|---------------------------|-----------------|------------------|-----------|------------|------------|-----|
|                              | Run Time Hours            | Capacity (Gals) | L = Length       | W = Width | H = Height | Weight lbs | dBA |
| Enclosed Set<br>w/ Fuel Tank | 72                        | 102             | 68"              | 29.6"     | 64"        | 1532       | 64  |

\*All measurements are approximate and for estimation purposes only. Weights are without fuel tank. Sound levels measured at 23ft (7m) and does not account for ambient site conditions.
